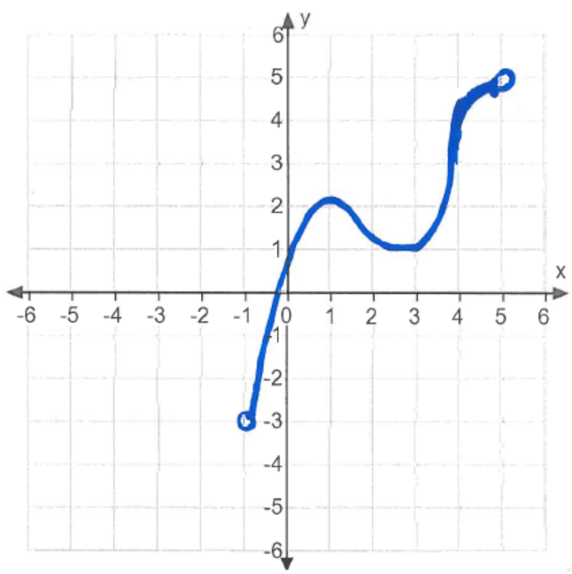
Problem 2

Problem 2

Problem 1 *In each problem, sketch a graph of a function meeting the given critera.*

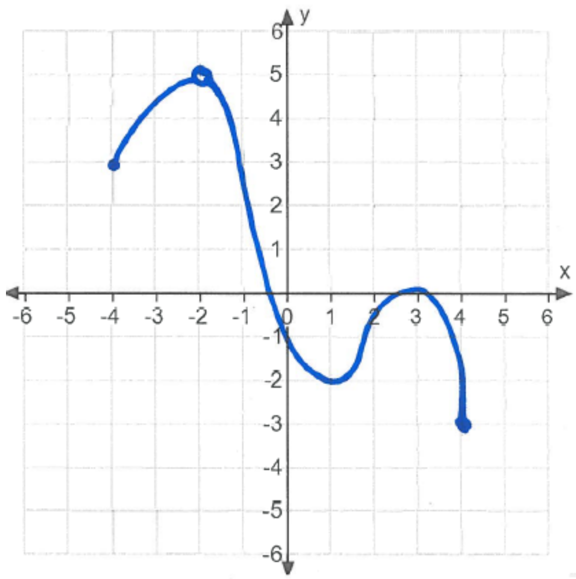
(a) *Sketch a possible graph of a function which is continuous on an open interval* $(-1, 5)$ *but does not have an global maximum or minimum.*

Explanation.



(b) *Sketch a possible graph of a function with an global minimum, a local maximum and a local minimum, but no global maximum on the interval* $[-4, 5]$.

Explanation.



(c) *Sketch a possible graph of a function f, continuous on $[1, 4]$ with the following properties: $f'(x) = 0$ for $x = 2$ and $x = 3$; f has a global minimum at $x = 4$; f has a global maxmimum at $x = 3$, and f has a local minimum at $x = 2$.*

Explanation.
