

# Problem 8

## Problem 8

**Problem 1** The figure shows the graph of a function  $f$ . Let  $L_a(x)$  be the linear approximation of  $f$  at  $a$ .

Circle ALL the correct statements below.

- (a)  $L_a(b) < f(b)$
- (b)  $L_a(b) > f(b)$
- (c)  $L_a(a) < f(a)$
- (d)  $L_a(a) > f(a)$
- (e) No statement (a) – (d) is correct.

**Explanation.** From the graph of  $f$  and the the graph of  $L_a(x)$  we see that the correct statement is (a):
