

Summary

Summary

Basic properties of the natural logarithm:

- $\ln(yz) = \ln(y) + \ln(z)$
- $\ln\left(\frac{y}{z}\right) = \ln(y) - \ln(z)$
- $\ln(y^z) = z \ln(y)$
- For any function g : $\ln(e^{g(x)}) = g(x)$
- $\frac{d}{dx}(\ln(f(x))) = \frac{f'(x)}{f(x)}$.
