

Problem 6

Problem 6

Problem 1 Let

$$h(u) = \begin{cases} \frac{u^2 - 5u + 4}{u - 4} & \text{if } u < 4 \\ \frac{-\sqrt{u+4}}{u-6} & \text{if } u \geq 4, u \neq 6. \end{cases}$$

- (a) What is the domain of h ?
- (b) Find all vertical asymptotes of h . **EXPLAIN.**
- (c) Find all horizontal asymptotes of h . **EXPLAIN.**
- (d) List the **Intervals of Continuity** for the function h .
