

Problem 7

Problem 7

Problem 1 Given the expression for $f(x)$, find the derivative of f^{-1} at the given point on the graph of f^{-1} , without solving for f^{-1} .

- (a) $f(x) = x^2 + 1$ (for $x \geq 0$); the point on the graph of f^{-1} : $(5, 2)$.

Verify your answer by evaluating the derivative of f^{-1} at the given point.

- (b) $f(x) = x^2 - 2x - 3$ (for $x \leq 1$); the point on the graph of f^{-1} : $(12, -3)$.
