

Problem 2

Problem 2

Problem 1 For each of the following functions find an equation of the tangent line at the given point.

(a) $f(x) = -5x^2 + 7x - 9$ at $x = 3$.

(b) $g(u) = \sqrt{5u - 4}$ at $u = 3$.

(c) $s(z) = \frac{z}{z - 5}$ at $z = 3$.
