

Problem 4

Problem 4

Problem 1 The graph of a function p and a point in its domain, b , are shown in the figure below.

- In the figure above, draw and mark clearly the quantity $\Delta y = p(b) - p(1)$ and the quantity $\Delta x = b - 1$.
- Complete the sentence. The quotient $\frac{p(b) - p(1)}{b - 1}$ is the slope...
- Complete the sentence. Provided it exists, the limit $\lim_{x \rightarrow 1} \frac{p(x) - p(1)}{x - 1}$ is the slope...
