

Problem 1

Problem 1

Problem 1 True or False: If f is continuous on the closed interval $[a, b]$, then

$$\frac{d}{dx} \left(\int_a^b f(t) dt \right) = f(x)$$

Explanation. False. $\frac{d}{dx} \left(\int_a^b f(t) dt \right) = 0$ since $\int_a^b f(t) dt$ is a constant and $\frac{d}{dx}(\text{constant}) = 0$.
