

Problem 4

Problem 4

Problem 1 Find the derivatives of the following functions:

(a) $f(x) = x^{e^x} + 7x$

(b) $g(x) = (\ln(x) + 9)^{\sec(x^4)}$

(c) $f(x) = \frac{(x+1)^5(\sin(x)+5)^4}{(x^2+5)\sqrt{x-3}}$

(d) $h(x) = \frac{(x^2-7)^5}{\cos^7(x^2-5)}$
