

Problem 8

Problem 8

Problem 1 The figure shows the graph of a function f . Let $L_a(x)$ be the linear approximation of f at a .

Circle ALL the correct statements below.

- (a) $L_a(b) < f(b)$
- (b) $L_a(b) > f(b)$
- (c) $L_a(a) < f(a)$
- (d) $L_a(a) > f(a)$
- (e) No statement (a) – (d) is correct.

Explanation. From the graph of f and the the graph of $L_a(x)$ we see that the correct statement is (a):

Problem 8
