

Problem 1

Problem 1

Problem 1 The graph of $g(x) = e^x$ is given below.

- Find the domain and range of g .
- Find the values of $g(1)$, $g(0)$, $g(-1)$ and plot the points $(1, g(1))$, $(0, g(0))$, and $(-1, g(-1))$ on the graph of $g(x) = e^x$.
- Graph $h(x) = \ln(x)$ on the same axis as $g(x) = e^x$.
- Find the domain and range of h .
- Find the values of $h(1)$, $h(0)$, $h(-1)$, $h(e)$, $h\left(\frac{1}{e}\right)$, or say x not in the domain.
