

Problem 6

Problem 6

Problem 1 The entire graph of $f(x)$ is given below.

- Find the domain and range of f
- Find the values of $f(-3)$, $f(-2)$, $f(-1)$, $f(2)$
- Find the intervals on which $f(x)$ is positive. Find the intervals on which $f(x)$ is negative.
- Find the intervals on which f is increasing. Find the intervals on which f is decreasing.
- True or False: $f(1.5) < f(2)$
