

Problem 7

Problem 7

Problem 1 Determine if the function is even, odd, or neither.

(a) $h(x) = x^4 + x^2 - 3$

(b) $s(t) = t^2 - t$

(c) We know that $\sin(\theta)$ is odd and $\cos(\theta)$ is even. Is $g(\theta) = \tan(\theta)$ even, odd, or neither?
