

Problem 8

Problem 8

Problem 1 Using the known graphs of $y = \sqrt{x}$ and $y = \frac{1}{x}$, sketch the graphs of the following using transformations.

(a) $y = \sqrt{x+2} - 3$

Explanation. This is a shift of $y = \sqrt{x}$ moved left two units and down three units.

(b) $y = \frac{1}{x-4} + 1$

Explanation. This is a shift of $y = \frac{1}{x}$ moved right four units and up one unit.

Problem 8
