

Problem 8

Problem 8

Problem 1 Suppose a taxi ride costs \$7.50 for the first mile (or any part of the first mile), plus an additional \$1.00 for each additional mile (or any part of a mile).

- (a) Graph the function $c = f(t)$ that gives the cost of a taxi ride for t miles, for $0 \leq t \leq 5$.
- (b) Evaluate $\lim_{t \rightarrow 2.9} f(t)$
- (c) Evaluate $\lim_{t \rightarrow 3^-} f(t)$ and $\lim_{t \rightarrow 3^+} f(t)$
- (d) Interpret the meaning of the limits in part (c).
- (e) On what intervals is the function c continuous? Explain.
