

Problem 2

Problem 2

Problem 1

(a) *Fill in the blanks*

$$f'(x) = \lim_{h \rightarrow 0} \frac{f(x+h) - f(x)}{h}$$

if the limit exists.

(b) *Let*

$$f(x) = \frac{1}{x+4}.$$

Use the (limit) definition of derivative in (a) to find $f'(x)$.
