

Problem 1

Problem 1

Problem 1 Explain what each of the following means:

(a) $\sin^{-1}(x)$

Explanation. This denotes the inverse function to $\sin(x)$, sometimes denoted by $\arcsin(x)$.

(b) $(\sin(x))^{-1}$

Explanation. This means $\sin(x)$ raised to the -1 power, i.e. $\frac{1}{\sin(x)}$.

(c) $\sin(x^{-1})$

Explanation. This means $\sin\left(\frac{1}{x}\right)$.
