

Problem 5

Problem 5

Problem 1 Determine the following information about the given function and then graph the function:

$$f(x) = x \ln(x)$$

Domain

x, y -intercepts

Symmetry

Intervals of increasing/decreasing

Maxima/Minima (including absolute)

Intervals of concavity

Inflection points

Given $\lim_{x \rightarrow 0^+} f(x) = 0$, sketch a graph f .
