

Problem 5

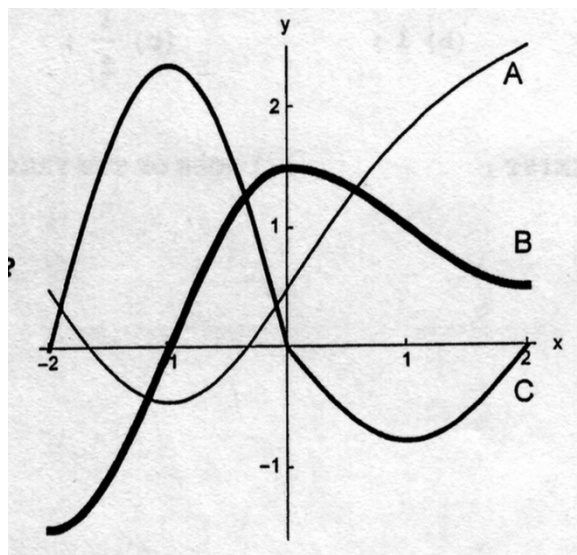

Problem 1 (a) The (entire) graph of a function f is shown in the figure below.

Find the interval (or intervals) on which the derivative of f is increasing.

Explanation. f' is increasing on $(0, 1)$: f is concave up on this interval

(b) The figure below shows the graphs of f , f' , and f'' . Which curve is which?

Problem 5

Explanation. Graph A is f , Graph B is f' and Graph C is f'' .
