

Problem 5

Problem 5

Problem 1 A curve is given in the figure below, where $f(x) = 8/x$.

- In the figure above, draw a secant line joining the points $A = (1, f(1))$ and $B = (8, f(8))$.
- Find the slope, m_{sec} , of this secant line.
- Show that the function f satisfies the conditions of the Mean Value Theorem on the interval $[1, 8]$ and find a point (or points) guaranteed to exist by the Mean Value Theorem.
