

Problem 14

Problem 14

Problem 1 We're given the following graph of a function:

Use this graph to answer the following questions:

- What is the domain of this function?
- What is the range of this function?
- What is the value of $f(0)$, $f(1)$, and $f(2)$?
- Does this function have an inverse? (Why or why not?)
- Find at least two intervals on which the function is one-to-one.
- Find $f^{-1}(3)$ on a restricted domain of f .
- Using the restricted domain for f of $(-\infty, 0)$, sketch a graph of f^{-1} .
- Using the restricted domain for f of $[0, 1) \cup (1, \infty)$, sketch a graph of f^{-1} .
